

## Avec les pièces du « puzzle aztèque »

Les pièces formant ce puzzle sont des bases des prismes formant la « pyramide aztèque ».

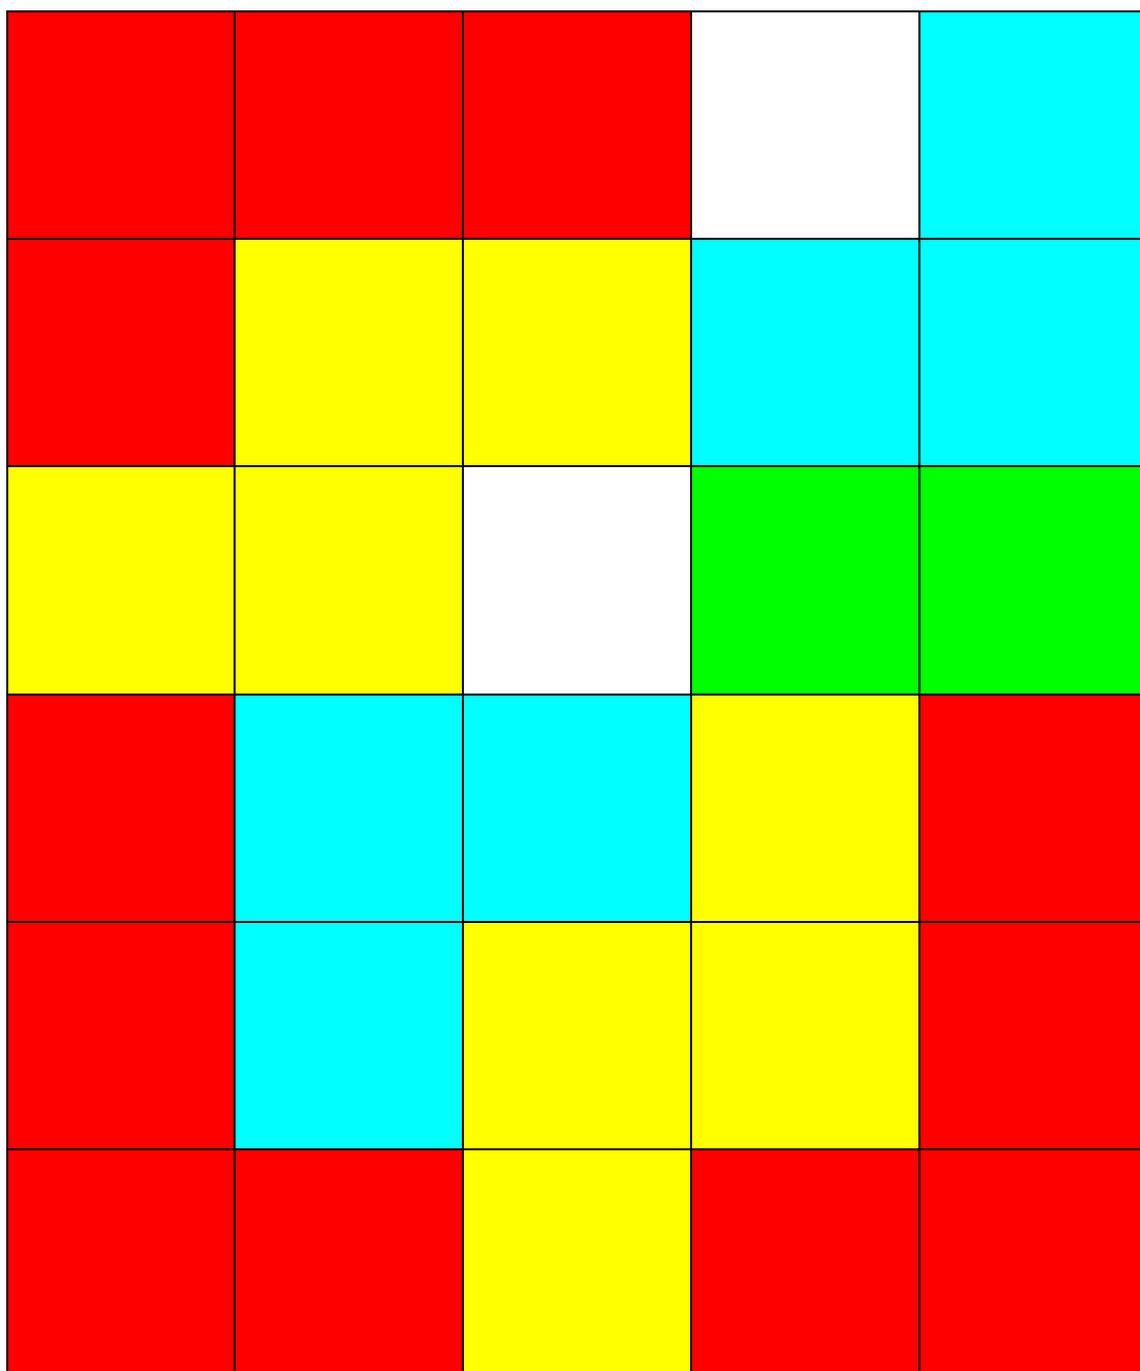

Les pièces photographiées ont été réalisées avec du « carton mousse ». Les deux faces sont colorées, les pièces sont retournables.

Les carrés blancs utilisés dans les propositions qui suivent ont 3 cm de côté.

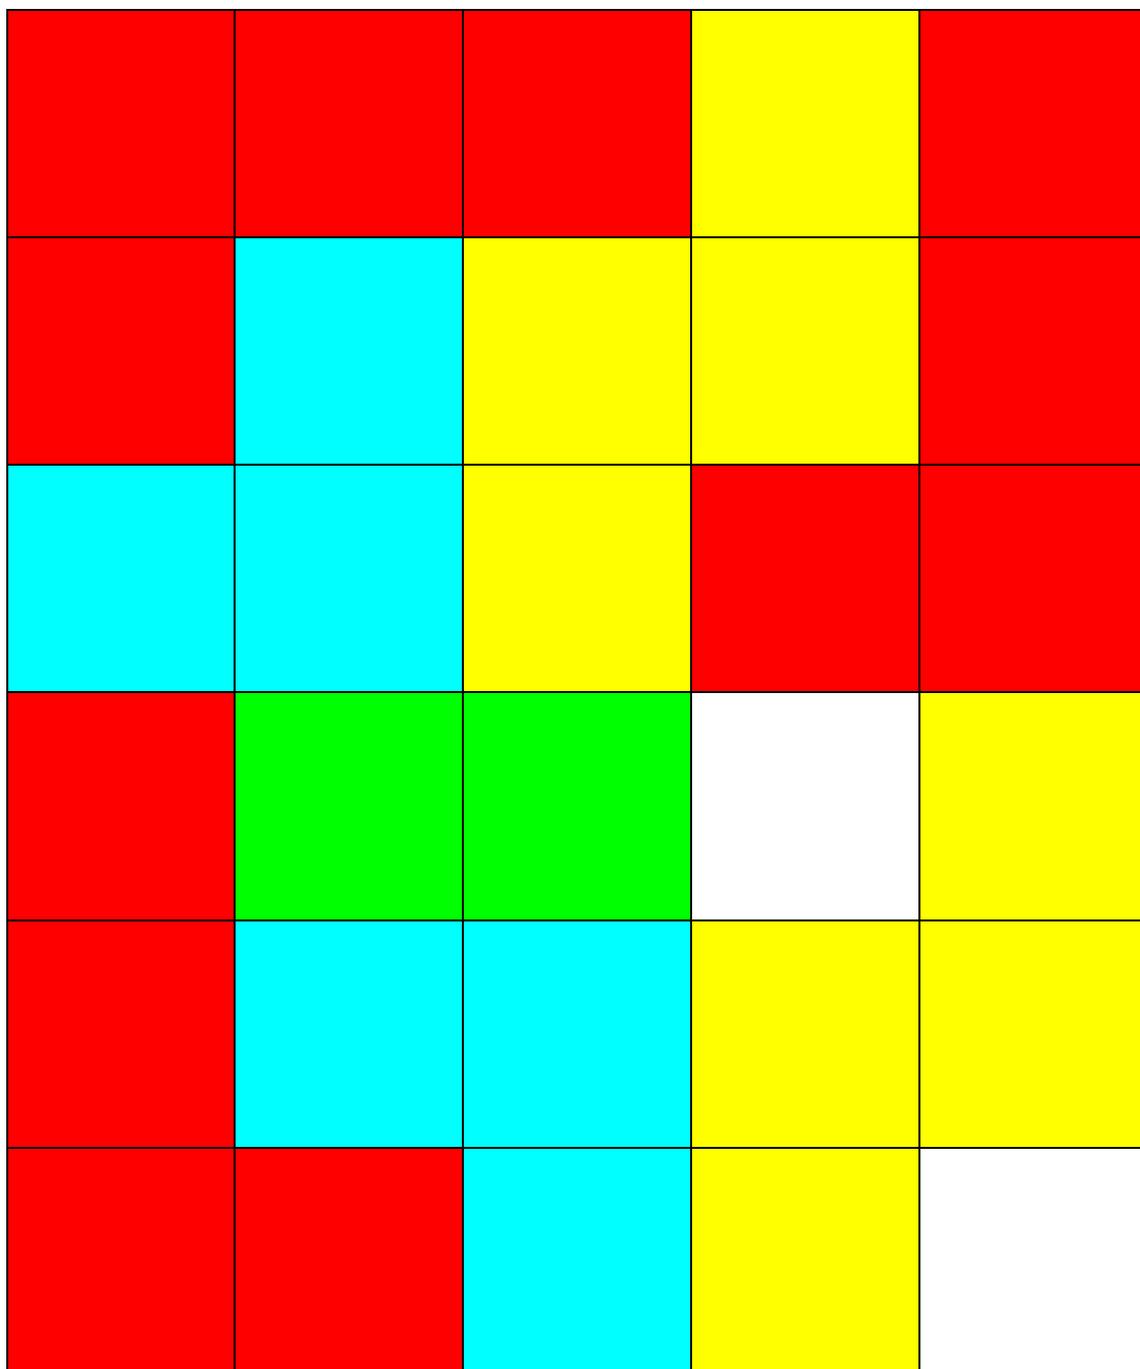

### **Des rectangles à recouvrir (1) et (2)**

Dans le premier, les pièces de même couleur ne sont jamais en contact, facilitant le recouvrement. Ce n'est plus le cas dans les trois rectangles suivants. Dans le deuxième, les limites des pièces restent faciles à retrouver. Dans le troisième et dans le quatrième, l'utilisation d'assemblages de deux pièces de même couleur pourra venir en aide.
