

Les fraction'hommes

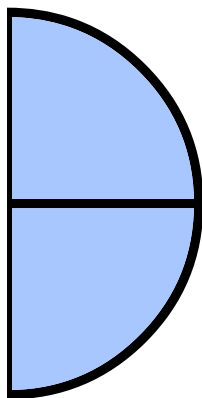

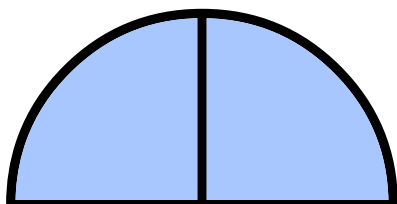

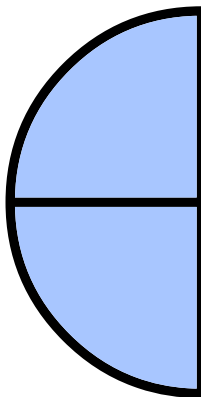

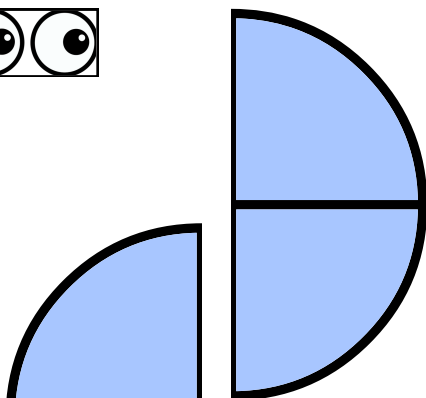

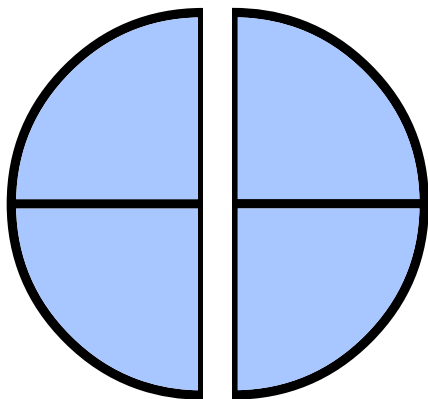

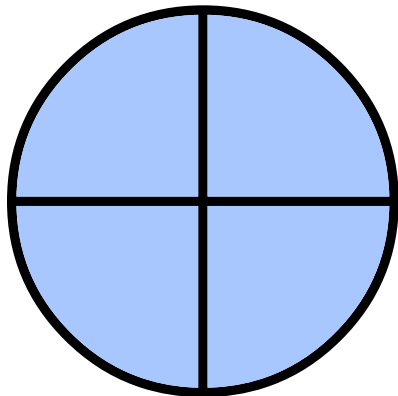

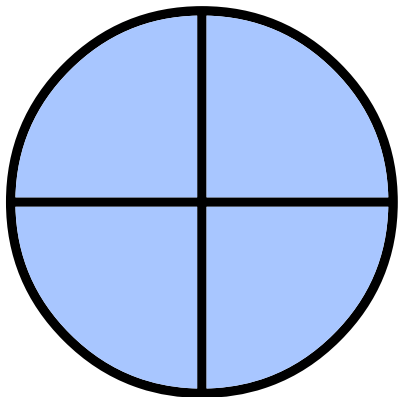

But du jeu: remplir son bonhomme en premier.

Déroulement:

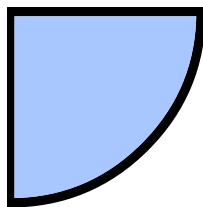

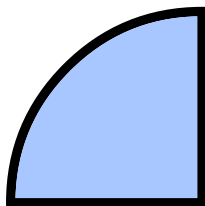

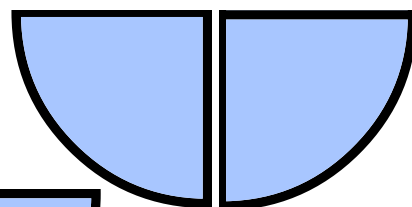

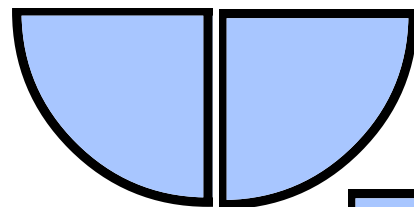

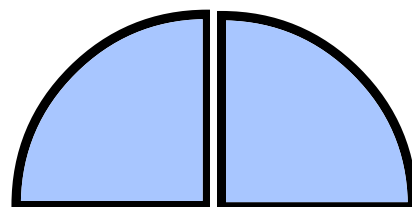

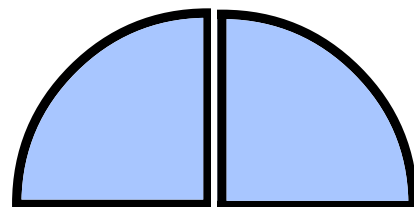

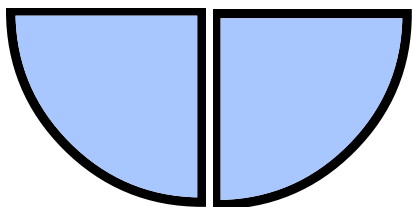

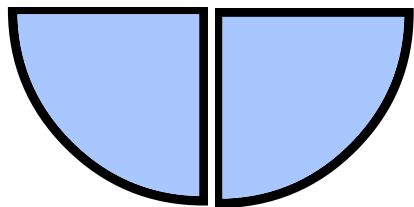

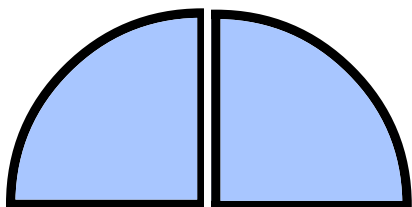

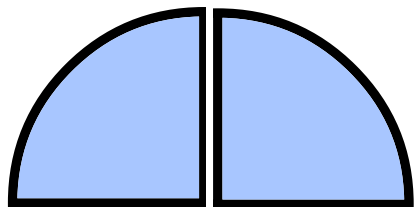

- Chaque joueur choisit un bonhomme et prend les pièces correspondantes à l'unité (grisée sur le personnage) qui le compose: disque, carré, hexagone ou losange.
- Chacun tire ensuite une carte et celui avec la plus grande fraction commence.
- Ce dernier prend la/les pièce(s) qui correspond(ent) à la valeur de la fraction pour la/les placer sur son bonhomme. Par exemple pour 1 unité, le joueur peut décider de poser l'unité complète, 2 moitiés d'unité, 4 quarts d'unité ou une moitié et 2 quarts d'unité.
- Les autres joueurs valident ou invalident la proposition (dans ce cas le joueur doit enlever les cartes posées) puis jouent tour à tour.
- Si un joueur ne peut pas poser la valeur de la carte tirée, il passe son tour.
