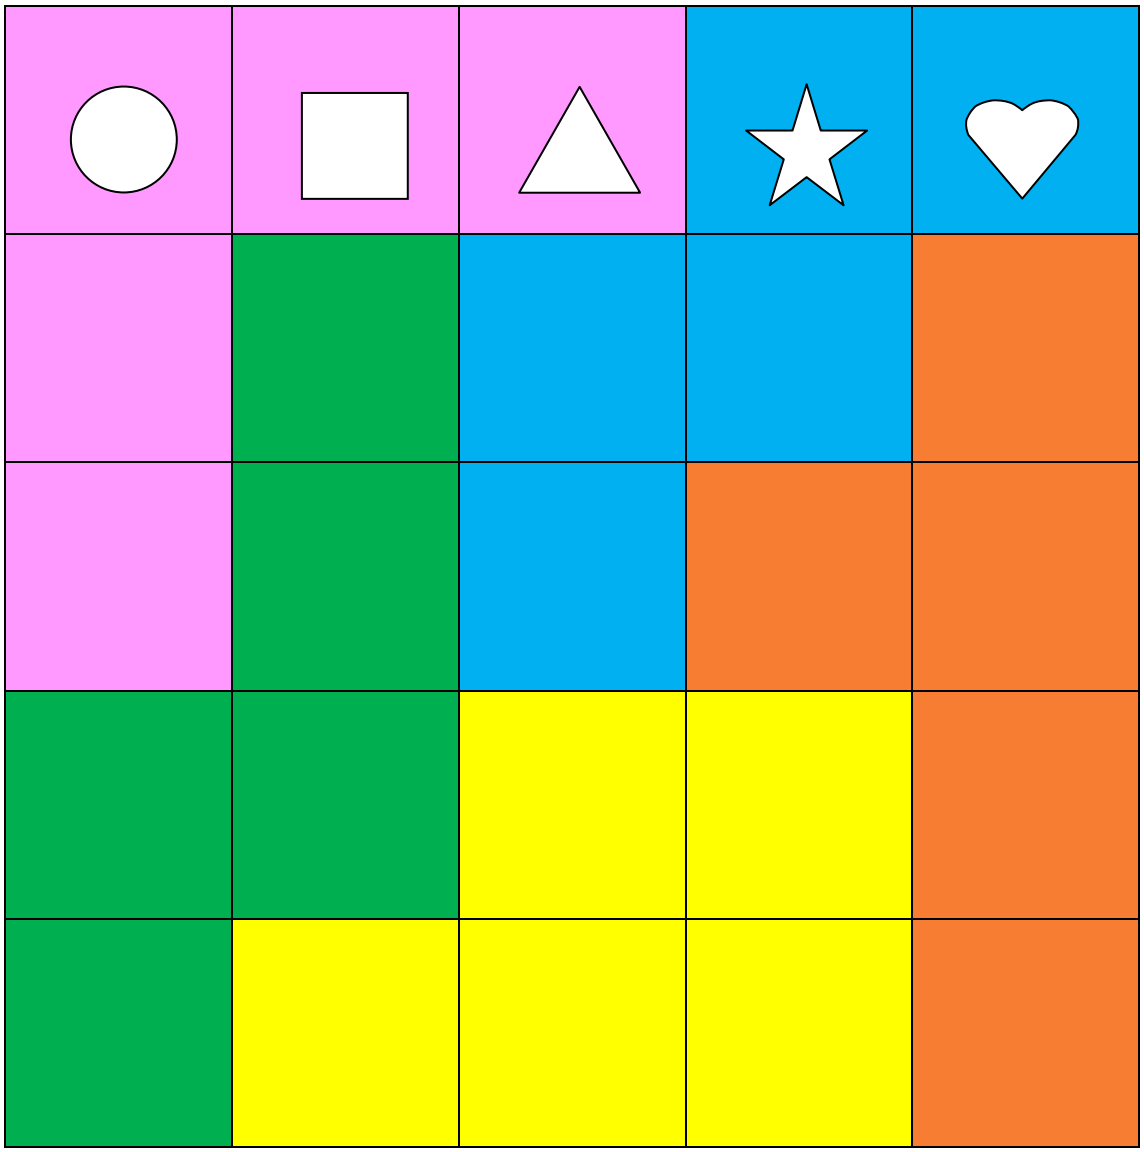
DEFI MATHS CP – PERIODE 3 – ANGLAIS

Look at this: it's a table with lots of squares.



There are five lines. There are five columns.

There are five coloured zones: one zone is blue, one zone is pink, one zone is yellow, one zone is green and one zone is orange.

There are five shapes:

a square a circle a triangle a star a heart

These five shapes have to be once in each line, once in each column and once in each colored zone.

Put the shapes into the table.
