

Défi – Maths en anglais : CM2

Our street:

This is our street :

There are 5 houses in 5 different colours.

In each house lives a family with a different nationality.

The 5 owners drink a certain type of beverage, love a certain kind of food, and keep a certain pet.

No owners have the same pet, love the same food, or drink the same beverage.

The question is: **Who has got a fish?**

We know that:

- The British family lives in the red house.
- The French family has got a dog.
- The Irish family drinks tea.
- The green house is on the left of the white house.
- The family in the green house drinks coffee.
- The family who loves pizza has got a bird.
- The family in the yellow house loves fish and chips.
- The family living in the centre house drinks milk.
- The Norwegian family lives in the first house.
- The family who loves hamburgers lives next to the one who has got a cat.
- The family who has got a horse lives next to the family who loves fish and chips.
- The family who loves pasta drinks soda.
- The German family loves chocolate cake.
- The Norwegian family lives next to the blue house.
- The family who loves hamburgers has a neighbour who drinks water.

Use these labels (cut them out) and the houses to find out who has got a fish ...

German family 	Norwegian family 	French family 	British family 	Irish family 
coffee	tea	water	soda	milk
pizza	hamburgers	fish and chips	pasta	chocolate cake
cat	dog	horse	bird	fish
blue	yellow	red	white	green
