

DEFI MATHS GS – PERIODE 3 – ANGLAIS

Look at this: it's a table with lots of squares.

There are three lines. There are three columns.

There are three coloured zones: one zone is blue, one zone is pink and one zone is yellow.

There are three shapes:

a square

a circle

a triangle

These three shapes have to be once in each line, once in each column and once in each colored zone.

Put the shapes into the table.
